

RADIA™

SECURELY CLOSE EVERY LID, EVERY TIME

The Lid Press is designed with a counter mount or mobile base plate to accommodate numerous lid closing environments as well as small to large or standard to metric units of measure.

LID PRESS SERIES

BASE PLATE MODEL SHOWN (5080-04)

5080 | LID PRESS

MINIMIZE NOISE, HUMAN ERROR AND PAINT SPILLS WITH ONE TOOL

Whether it's going in the mixer or the hands of your customer, the lid of the can has to be on tight. Avoid messy splatters with a mallet while assuring yourself and your customers that you can trust the seal of your lid every time. Using a mallet can be loud, potentially dangerous and unreliable. The Lid Press evenly applies pressure to the top of your can for an all over seal in a single motion so it's fast, safe and consistent.

- ▶ Tightly seals one gallon, quart, pint and half-pint containers quickly and quietly.
- ▶ Evenly applies pressure to ensure a tight seal for your containers.
- ▶ Seals ALL-PLASTIC, Hybrid and Metal containers.
- ▶ Heavy duty flip-out tray for sealing quart, pint and half-pint containers.
- ▶ Eliminates splattering commonly associated when sealing containers with a rubber mallet.
- ▶ Available in Base Plate (5080-04), Counter Mount (5080-03) and Metric (5080-M) product models.
