

Automation Systems

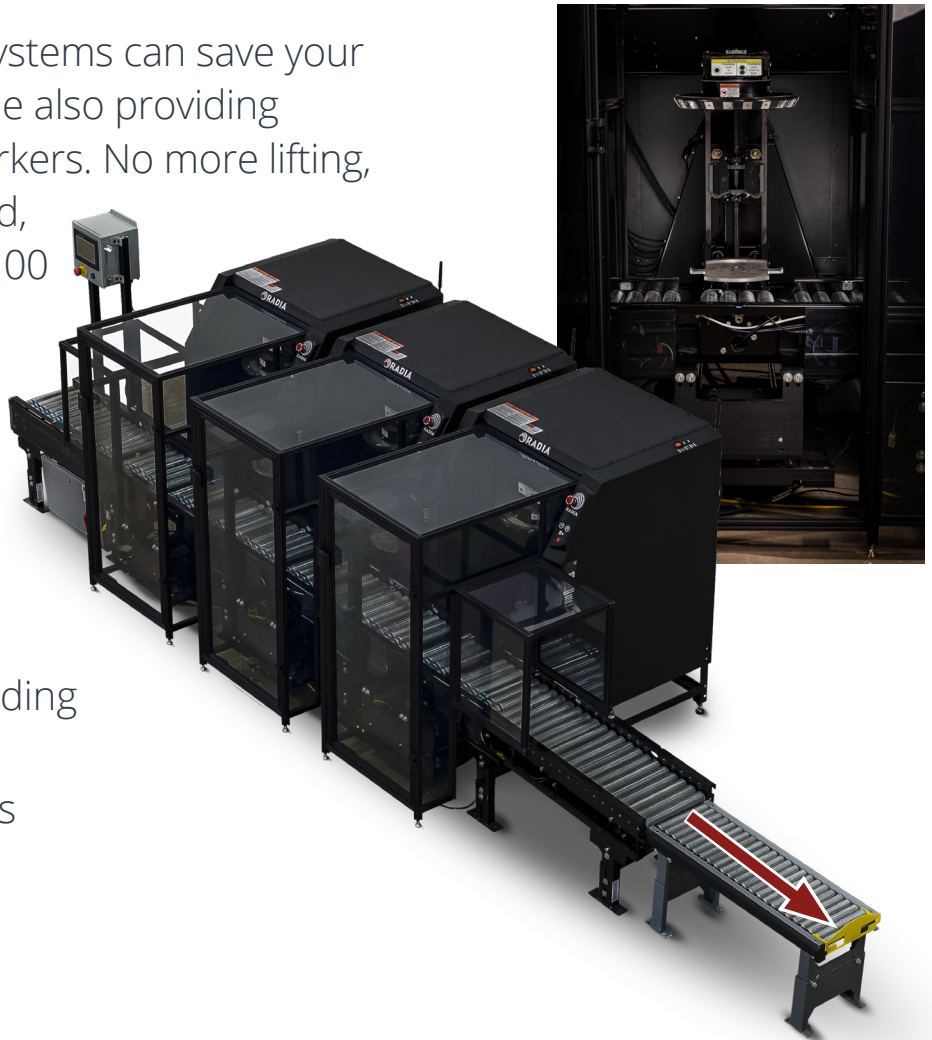

SAVE TIME MONEY

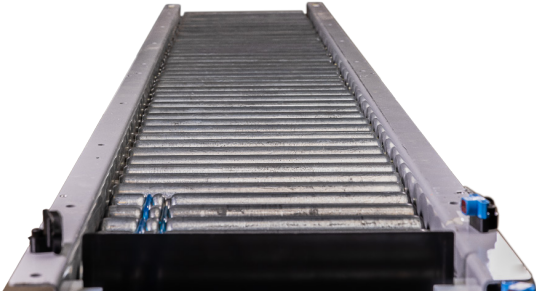

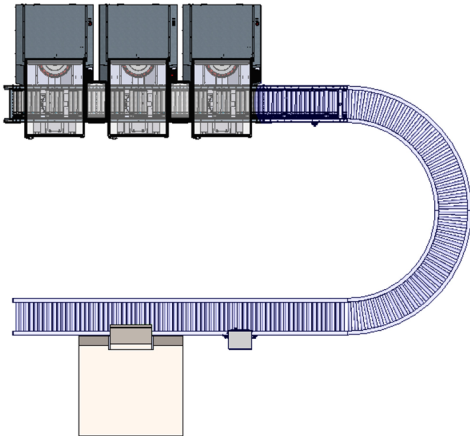

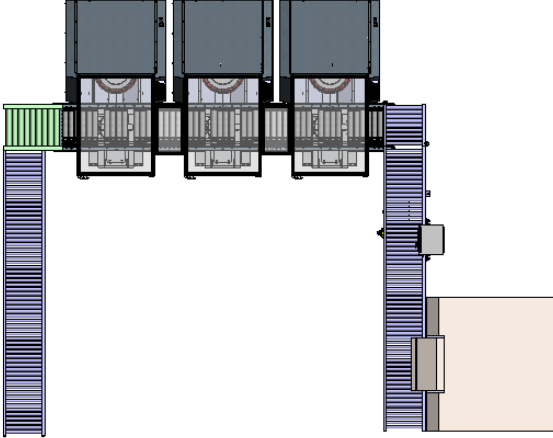

Fully customized automation systems can save your company time and money, while also providing ergonomic benefits to your workers. No more lifting, pushing, or pulling pails. Instead, one person can safely mix 30-100 5-gallon pails per hour, and pails are moved, loaded from mixers, and unloaded automatically.

Additional benefits include:

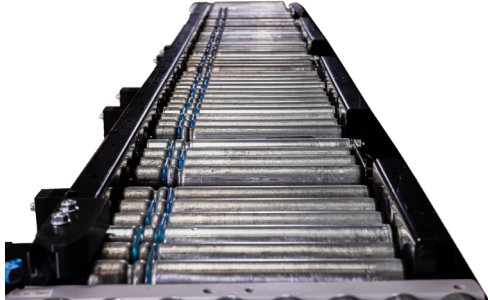

- Modular design to fit your specific needs – flexible conveyer configuration including directional configuration
- Quiet mixing systems, mixers operate at 60 decibels
